

TALLURU CHANDRAKANTH

+91 8328645249 | talluruchandrakanth131105@gmail.com | Tirupati, India | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate specializing in Artificial Intelligence and Data Science with hands-on experience in Python, SQL, and AI-driven application development. Skilled in building full-stack web applications, REST APIs, and machine learning solutions through academic projects and an AI internship. Passionate about solving real-world problems and eager to contribute as a Software Engineer while continuously learning new technologies.

EDUCATION

B.Tech — Computer Science & Engineering (AI & Data Science)

Aug 2023 – Present

CGPA: 8.49/10.0

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology, Chennai, India

TECHNICAL SKILLS

Languages: Python, SQL

AI / ML: Agentic AI, Generative AI, Machine Learning Techniques

Libraries: Pandas, Numpy, Matplotlib

Tools: Git, GitHub, VS Code, MySQL Workbench

Soft Skills

Problem Solving, Analytical Thinking, Team Collaboration, Communication Skills, Adaptability, Time Management

PROJECTS

Career DNA — Developer Analytics Platform

Python | Streamlit | GitHub API | Gemini 2.5 Flash API | PyPDF2 | Pandas

- Constructed a career analytics web app integrating GitHub REST API to score developer consistency metrics.
- Developed an automated resume parsing module using PyPDF2 and pandas; leveraged Gemini 2.5 Flash API to auto-generate role-specific technical interview questions.

Grow Hub — AI-Powered Resume Analyzer

Python | Streamlit | TF-IDF | Scikit-learn | Pandas | NumPy | PyPDF2

- Programmed a developer analytics web app integrating the GitHub REST API to score 5+ consistency metrics (commit frequency, repository count, streak duration), surfacing actionable insights for career benchmarking.
- Automated resume parsing using PyPDF2 and Pandas to extract structured candidate data; integrated the Gemini 2.5 Flash API to generate role-specific technical interview questions, cutting manual preparation time by 95%.

Real Time Event Management System

Node.js | Express.js | MySQL | REST API

- Developed a dynamic event management web application using Node.js, implementing role-based access control and session management to securely route administrators and standard users.
- Engineered backend concurrency logic utilizing SQL constraints to validate total available event slots against current available registration counts in real-time.

PROFESSIONAL EXPERIENCE

Artificial Intelligence Intern

Jul 2025 – Sep 2025

EduTantr, Bengaluru, India

- Spearheaded the architecture and deployment of Grow Hub, a full-stack AI career platform built with Python and Streamlit, reducing manual resume screening time by 97%.
- Implemented NLP techniques (TF-IDF, cosine similarity) to build a skill extraction engine, consistently attaining 85%+ keyword matching accuracy against 100+ job descriptions.

CERTIFICATIONS

- Python Essentials 1 & 2 — Cisco Networking Academy
- Technology Job Simulation — Deloitte
- Data Analytics Job Simulation — Deloitte
- Machine Learning for Soil and Crop Analysis — NPTEL
